

# Hosted Desktop - Factsheet

## Hosted Virtual Desktop – flexible, secure and accessible

Why is Hosted Desktop becoming so popular amongst UK businesses? The drivers behind the decision to move to the cloud are different for each business but the benefits can be far reaching. Hosted services provide not only a new way of funding your IT through just a simple monthly cost but by nature will keep you up to date with the latest technologies without having to re-invest in costly hardware, software and office applications.

The ultimate benefit of the cloud is the flexibility and mobility it gives your business. This creates freedom to work from any location, on any device, with access to all of the data and applications you have on your office-based PC. As your business matures, you can add or remove resources and only pay for what you need with no long-term contracts.

## Your office - wherever you are!

Open, edit and save your favourite programs and office applications from your computer, laptop, tablet or smartphone; Hosted Desktop is even accessible using 3G and 4G connections.

As well as Microsoft Office, we can also install your other business applications such as Sage, Act, Quick Books or other Windows compatible apps and more on your FREE application server for remote access.

Your Hosted Desktop can run on a Windows PC, Apple MAC, iPhone, iPad, or Android device. With our Hosted Desktop technology your business is truly portable.

## Why choose Cloud4?

Cloud4 is a **leading, trusted and UK-based** Exchange email provider with reliability which consistently beats all others in the market. We get to know you, tailoring all of our solutions to your business and ensuring that you receive the services most relevant to you; pricing is straightforward to help you budget.
