MyOwnCloud - Factsheet

CLOUD4
Where *IT* Happens

Easily sync content across all your devices!

MyOwnCloud is an enterprise grade solution for online file sharing for businesses, charities and other organisations! Now your users can sync and share all their documents and other content seamlessly across the desktop, SmartPhone, Tablet and the cloud easily, making your important data safe and secure in our UK based ISO-27001 certified datacentres.

With demand for online file sharing solutions for business increasing, one of the most important factors of choosing the right service is the location of your data and where will it be stored. For many organisations across industries, the location data is stored is a key consideration to help to meet ever increasing compliance standards. MyOwnCloud is hosted here in the UK and supported 24/7.

Unlike many other popular services which can be expensive, consumer focused, hosted outside the UK and have minimum user requirements, MyOwnCloud is cost effective, built for business, has no minimum user requirements and is securely hosted in the UK.

Get MyOwnCloud on any device of your choice!

With MyOwnCloud you can setup time based expiry on content you share, recovery deleted files easily and even work on your files offline where there is no connectivity such as a train or plane. It will automatically sync across your other devices as soon as you reconnect keeping everything up to date where ever you need to view or amend it.

Features and Benefits of MyOwnCloud Include:

- ✓ Share your files and sync on multiple devices
- ✓ Share files/folders with clients and partners
- ✓ Set expiry dates on shared content
- ✓ Work locally offline, auto sync on re-connected
- ✓ Choice of Office 2013 versions
