

Online Backup - Factsheet

Online Backup for your business

Cloud4's Online Backup provides a FULL backup for disaster recovery, backing up important applications such as Microsoft Exchange and SQL in the correct format for recovery. Online Backup will save you critical time and expense in getting your business operational again should you experience data disaster.

Cloud4 has created a comprehensive online backup and recovery solution for UK organisations, hosted securely in the UK. The award-winning software was designed to provide not only online data storage but a complete business continuity and recovery service. Our managed solution is supported by our professional UK-based team, with unmatched levels of customer service.

We're so confident in our fully-automated disaster backup software, you can try it for FREE for 30 days - we'll even install it free as well!

Piece of mind for you

Our Online Backup ensures that all your files and applications are backed up in a secure datacentre.

The purpose of Online Backup is simple. Backing your business' information up in a datacentre prevents any data loss as a result of fire, theft or hard drive corruption.

With today's greatly improved internet speeds, Online Backup is becoming the most common way to protect your critical data.

Why choose Cloud4?

Cloud4 is a leading, trusted and UK-based Exchange email provider with reliability which consistently beats all others in the market. We get to know you, tailoring all of our solutions to your business and ensuring that you receive the services most relevant to you; pricing is straightforward to help you budget.

Cloud4's quality of service sets us apart; hosted Exchange clients can contact us 24 hours a day, 7 days a week for personal, direct support from a team which is focused on delivering exceptional customer experiences.

Our innovative team has worked with hosted Exchange since 2009. We are consistently at the forefront of the technology, investing heavily in the development of the services we provide.
